"How should I Sleep?"

MOTION PICTURES MADE DURING INVESTIGATION UPSET OLD THEORIES

Automatic motion picture cameras recorded the positions and movements of sleepers during the investigation at Mellon Institute. The sleep habits of 150 persons were studied. More than 2,000,000 observations were made.

Millions of mattresses now in use are enemies of Vitalizing Rest

"DON'T sleep on your back" . . . "Don't sleep on your face" . . . "Don't sleep on your left side—it forces your heart to pump the blood uphill."

Old theories . . . now swept aside. For six years sleep has been studied by a group of scientists at Mellon Institute, Pittsburgh—the first broad scientific investigation of this subject ever made.

Now the advice is: Sleep anyway you like. Sleep on all four sides . . . so much the better. Curl up . . . stretch out . . . roll over . . . fine! *And be sure that your mattress lets you do all these things if you want complete rest.*

Why? Because *we rest in parts.* One position rests one set of muscles and organs. Another position rests another group. The normal, healthy sleeper takes 10 to 15 different positions during the night . . . and shifts from one position to another 20 to 45 times!

. . .

Anything that limits the number of positions which can be taken in comfort is *bad.* Solid mattresses . . . mattresses padded down in bumps and hollows . . . these are bad. Not just uncomfortable, but definitely *bad.*

The investigation has shown that a new type of mattress . . . the Simmons *Beautyrest* and *Deepsleep* . . . is ideal. In place of stuffing or layers of padding, in these mattresses are hundreds of springy inner coils, buried under soft cushioning. Coils which are always "alive." They *can't* pad down . . . they *can't* form bumps and hollows.

See the Beautyrest and Deepsleep at any good furniture store. Here is a new kind of comfort. And a small investment indeed, compared with the rewards of vitalizing rest!

H. M. Johnson, Ph. D.—head of the Investigation of Sleep at Mellon Institute—has written a booklet, "Bodily Positions in Restful Sleep." Send for it! Address the Simmons Company, 222 North Bank Drive, Chicago, Illinois.

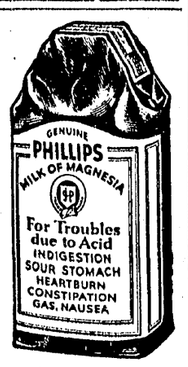
GAS relieved



WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate with no harmful after-effects.

Once you learn this perfect way you'll never deal in any other manner with the headaches, gas, bloating, nausea, dizziness, indigestion, biliousness, etc., due to an over-acid stomach and bowels.

Be sure to get genuine Phillips'. It is always a liquid; never made in tablet form. Look for the name Phillips on the bottle. All drugstores—25c and 50c.
