Campfire Girls Seminole Heights

(BY MRS. G. D. BERRY)
Third Day in Camp Padgett
The call to rise was given at 6 o'clock. The tent doors opened, oh so slowly...

going to have a terrible storm. We listened, expecting every minute to have to get up and roll ourselves up together in the middle of the tent floor to keep from getting a tent shower or bath. I heard it again—going to my tent door I stuck my head out and listened in the direction of the thundering sounds...

Visitors' Day—Fourth Day at Camp Padgett
The shrill ones of Pete's whistle sounded through the cool, clear morning air at 5:30 a.m. Everything was beautiful. The sky was clear and the view through the magnificent pine trees to the still waters of Lake Padgett was beautiful...

This was her day to help serve and this being visitors' day the duties were a little more strenuous, so her request to be excused was granted. She went here to the three girls, Anita, Vera and Ruth, who served today did exceptionally well. Their task was harder than that of other days because of our guests. Their place cards of bark from the pine trees with little flowers tied on corners with green raffia were very attractive. We gave them three cheers and a hearty vote of thanks.

After the plunge our regular morning program was carried out. The films having arrived we secured our first pictures today. Before the girls could say here that they were tired, our guests were attracted by cries of "We soon learned their cause to be the arrival of our first guests of the day. They were Mrs. Wright, Mrs. Prell, Mrs. Ritter and Edna Wells. They made the journey from Seminole Heights in little less than an hour, their auto registering the distance to be sixteen miles. Of the good things they brought to eat, three watermelons, three loaves of bread, lamb roast, cinnamon rolls and last but not least a box containing 400 marshmallows. We Camp Fire Girls knew what they were for. Our guests enjoyed our breakfast with us. We showed our joy in their visit by singing our guests' welcome song: "Our guests, may they again come soon, come soon"

Breakfast was hardly over when the call was given that it was time to meet the train. So in a hurry, we left camp for our hike to the depot, some of the girls with pleasant anticipations of seeing some local ones whom they had not seen for four long days. The expectations were partly fulfilled when the door of the private (?) car opened and with great pomp and magnificence our stepped our most worthy friend, Mr. Whitacre. We greeted him cordially and were about to bid him adieu, but he seemed willing to leave. They still

looked at the train anxiously, hoping to see other similar creatures. We were soon forgotten when a like to the cowpea patch was suggested. We saw the place pointed out to us by the "mysterious lady," apparently only a short distance from the depot. We walked through the pine forest, expecting to make a straight cut to the place but suddenly came to a pond which we had to go around. We soon came to a bridge which led to the house. We reached the house, opened the gate and went in. We went upon the front porch, the door was open. Going in we saw signs of civilization. We thought we had reached the house our "mysterious lady" had told us was unoccupied. Going out the back door we were greeted by a human being. We explained to him why we were there and he informed us that we were in the wrong place. It was, however, a very pleasant surprise. We were accepted as guests, allowed to drink from his pump and showed us our desired patch a quarter of a mile further on. We hiked on, found the patch and returned home, hot, tired creatures, but happy because of our adventure. On our return we were delighted to find again our Mr. Whitacre, Mr. Andrews, Mr. Gillett and son and Mr. Berry.

Our beautiful bright sunshine was fast disappearing and by 10:30 a.m. a storm was on. It rained until 8 p.m. Being so nicely sheltered, however, we enjoyed the cool, refreshing rain. Recreation hour was delightful as was also another bath. We ate lunch during the rain. Our dinner of lamb roast, macaroni and cheese, mashed potatoes, rice, hot biscuit, ice tea and watermelon was the "best yet." All appetites continuing to improve.

After dinner because of the down-pour we stayed around the tables under dining tent, working baskets, writing, talking and listening. The guests were entertained by some of the following scenes:

Sitting back in a secluded corner the soft, mellow tones of Vera were heard trying to convince Iris that even though she might have to wash dishes tomorrow, when her day to serve should arrive, that her hands would assure the usual excitement at least a week if properly treated.

From another nook the soft melodious tones of Madeline and Wilma were heard scrapping over a piece of green raffia, Madeline finally snatching it and rushing to her tent. Elizabeth, Helen, Ruth and Hazel were in another corner earnestly trying to settle whether "Squire Jones" house burned up or down. Madeline, Julia B. and Jennie were trying to decide who "swiped" a bunch of pine needles Jennie had carefully hidden under her bedding in the tent. Edith, as usual, was conspicuous by her absence.

During the afternoon, even though it was raining, another auto was seen approaching through the woods. In it was our friend and postman, Mr. Mitelman, wife and two children, also Mr. Stebbins and Raymond and Herbert Ritter. All scrapping ceased and smiles were unusually prolific now. Another swim in the rain, then supper. Our guests, wishing to get an early start, were prevailed upon to remain for our Camp Fire which was always the most enjoyable part of our day. Another Camp Fire in the rain, but the "sweetest" yet. The songs were sung, the dirges read and then the great event, toasting marshmallows, being held. This was over the delightful fire. All toasted noses and marshmallows to their heart's content. Our guests then had to leave us. After farewells were over the rain had ceased and we drew closer to the fire.

We told stories, recited Mother Goose in the most dramatic style. The ending was announced as "ending" after which in the solemn stillness of the night we told ghost stories. After these stories the girls again showed their Camp Fire courage by walking to their tents unattended, not one shriek being heard because of imaginary ghosts peering from behind the trees.

"To be sure 'all was well.' I made my usual good night round, administering 'sketeerina,' vaseline and adhesive plaster. Being sure that 'all was well,' we again went into the land of 'Sweet Dreams.' We are now hearing from every tent: 'Just think, only two more days. Can't we stay until Monday?'"

There were more visitors in the evening than ever before, and the merry games of the boys and girls were watched with much interest. Grace in Footwear

Style in women's shoes has come to be every bit as important as style in costumes and millinery. Shoes that are "just shoes" no longer tempt the woman who dresses carefully. She wants to select deliberately the shoes that suit her taste, fit her foot and harmonize with her costumes.

We are showing everything that is best and most significant in prevailing shoe fashions.

COST ADVANCING

Nearly every day brings notice from some manufacturer of an advance in prices of shoes, due to increase of from 25 to 100 per cent. in cost of materials. Those who realize this and

will make no mistake but will find a material saving over prices that must be placed on the incoming stocks.

We offer you a wide selection of excellent values and styles.

You Can Nurse Your Baby Longer. Instead of weaning him at five or six months, you can nurse him the full nine months that you should if, when he is little, you substitute one feeding a day of Nestlé's. It is like mother's milk that the baby will feel no difference. Nestlé gives him just that little extra food he needs to help along his growing little body. And when weaning time comes, he will change to the bottle gradually and easily on Nestlé's Food.

Nestlé's Food (A Complete Food—Not a Milk Modifier) It is better for the baby and is better for you. Your own health will be better because you are allowed to nurse nursing or two and go out into the fresh air. When you wean your baby on Nestlé's you know he is safe, because Nestlé's is always the same, always free from germs, always contains the same things that your baby needs. Don't wean him on cow's milk. You can never be sure of cow's milk even if you know it comes from a clean dairy, even if you know it is free from sickness. It has a tough curd the baby can't digest, and home modifying is uncertain. You cannot modify it with such scientific care as Nestlé's does it for you. Nestlé's—milk from healthy cows, purified, free from germs—the calf needs are modified, the baby needs are added. Reduced to a powder—it comes to you.
